BATTERY INSTALLATION
Remove water resistant cover. Slowly slide out the battery box from its compartment in the face of the timer. Install two new 1.5 V alkaline batteries (size AAA). Replace battery box and water resistant cover.

TIMER INSTALLATION
Hold the unit steady. Loosen the large locking collar ring located in the top of the timer until the inner black faucet collar is loose. Screw the black faucet collar onto the faucet/tap until it is hand tight, and then hand tighten the large locking collar ring. Turn on the faucet/tap to open the flow of water. Do not use wrenches or pliers to tighten the collars.

CONTROL KEY DEFINITIONS
▲ or ▼  advance or reverse key
①  display current time
②  confirm input data
③  set current time and day
④  set watering program (1-16)
⑤  and OFF  erase all program data
⑥  ON OFF  manually operate timer

1. Press PROG
2. Press ▲ or ▼ to review program
3. Press ① to return to current time.

LOW BATTERY INDICATOR
When the battery is running low, the valve closes automatically. Replace with new alkaline batteries.

TROUBLESHOOTING GUIDE
If the water does not come on, check the following:
• Be sure the faucet/tap is turned on.
• Check that the batteries are in good condition and are installed correctly.
• Check that the frequency and run times are the same as in your record.
• Be sure that the frequency setting is longer than the run time. If the frequency is set at 1 Hour, the run time cannot be set for anything over 60 minutes.

CAUTION
Protect the timer and its parts from freezing.
Prior to the first frost or freeze, remove the timer from the faucet and store it indoors until Spring. Remember to remove the batteries from the battery compartment.
Timer is for outdoor use only.
Timer is water resistant and not water proof.
Do not install timer in a location where it can be submerged in water.
This timer has drain holes to remove moisture from inside the case. Always install timer above ground and away from moisture.
